

We lead the industry
in state of
the art
security
services.

Established in 1994, The Protector Group began by supplying security to clients across the North East. Initially concentrating on Static Site Security or Manned Guarding, with the emphasis on quality rather than quantity by only taking on contracts within the company resources at that time.

This sensible approach helped to build up strong working relationships with our clients producing a "Secure Partnership", a principle and standard still continuing to this day. It is this belief in quality customer service that has allowed the company to develop into the region's leading total security provider. Eight years later, we expanded operations and provided safety and security services throughout the U.K. Following, in excess of two decades of solid trading activity, The Protector Group is established as one of the U.K.'s leading security companies, with offices in Gateshead, London, Manchester, Birmingham, Livingston and Hartlepool.

The Protector Group Limited holds SIA approved contractor status for the provision of Security Guarding, CCTV & Keyholding services as well as being an NSI/GOLD approved electronic systems installer. We supply a comprehensive, state-of-the-art

package of security products and services – including CCTV Systems & Installation, Intruder alarm systems, Fire detection systems, Event stewarding to Door supervision, Cleaning and much more – to ensure you can rest assured that your assets are protected by a professional service provider 24/7 every day of the year.

Our services range from the provision of site security for multi million pound construction projects all monitored in our BS5979 Cat 2 monitoring station, to holding a set of keys for businesses and householders. From conception to completion, we guarantee a bespoke service, delivered with a commitment to ensure that you and your assets are fully secured.

Our professional staff have vast industry experience, ensuring you receive effective and reliable provision, and with it, peace of mind.

MANNED SECURITY

THE
PROTECTOR
GROUP™

A specially trained security guarding officer performs services tailored to the needs of the client, since the services require customer knowledge and a close relationship, services are bespoke to the customer's business needs, and they vary greatly.

We recruit and train talented people, all vetted to BS7858, to deliver the right service to meet clients' individual requirements. Our team of contract support staff, operations managers and officer support managers is a dedicated community of security professionals and all are licenced by the SIA.

Our security officers are of the highest calibre possible and can be deployed to service the security needs of clients in all sectors. Our officers are supported by the latest security technology with electronic systems including alarms, access control, surveillance cameras, communications systems and reporting, verification and management software. We also offer BS8484 mandown devices for lone workers.

Our recruitment process is a vigorous one, highly detailed and always involving face-to-face assessment and testing. As a result of this, you can rest assured of the vigilance and dedication of an SIA approved, licensed, uniformed and professional security presence
